EDUCATION

- Bachelor of Technology in Information Technology from UCEN (2026) — **CGPA: 7.46**

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript
- **Backend Technologies:** Flask, Node JS, Express JS
- **Databases:** MySQL, MongoDB
- **Tools:** Git, GitHub, VS Code

ACADEMIC PROJECT

AI-Based Online Payment Fraud Detection

- Developed an AI-based application to identify potentially fraudulent online payment transactions.
- Used Python, Flask, and MySQL for application development and database management.
- Worked on transaction data processing and fraud prediction.
- Designed a dashboard to display safe transactions, fraudulent transactions, transaction amounts, and risk percentages.

INTERNSHIP EXPERIENCE

- Python Development Intern
- Full Stack Web Development Intern
- Android Development Intern
- UI/UX Design Intern
- Linux & Containerization Intern

KEY TECHNICAL LEARNINGS

- **Python & Finance Tracking:** Engineered a Personal Finance Manager using Python to structure financial records, track expenses, and manage budgets.
- **Full-Stack Web Development:** Developed LearnHub, a learning platform using the MERN stack (React.js, Node.js, Express.js, MongoDB) to gain end-to-end web development skills.
- **Android Development:** Built native mobile applications using Kotlin, focusing on Android architecture and app development principles.
- **UI/UX Design:** Designed user-centered wireframes and interactive prototypes, applying fundamental UI/UX principles to improve user experience.
- **DevOps & System Admin:** Practiced Linux command-line operations, basic system administration, and modern containerization concepts.
